Toronto marriages by the months*

Is the frequency indeed uniform, or is something else going on?

Andrew Goh

September 19, 2024

First sentence. Second sentence. Third sentence. Fourth sentence.

1 Introduction

You can and should cross-reference sections and sub-sections. We use R Core Team (2023), Gelfand (2022), and Wickham et al. (2019).

The remainder of this paper is structured as follows. Section 2

2 Data

Some of our data is of penguins (Figure 1), from Horst, Hill, and Gorman (2020).

Talk more about it.

And also planes (**?@fig-planes**). (You can change the height and width, but don't worry about doing that until you have finished every other aspect of the paper - Quarto will try to make it look nice and the defaults usually work well once you have enough text.)

3 Discussion

3.1 First discussion point

If my paper were 10 pages, then should be be at least 2.5 pages. The discussion is a chance to show off what you know and what you learnt from all this.

*Code and data are available at: LINK.

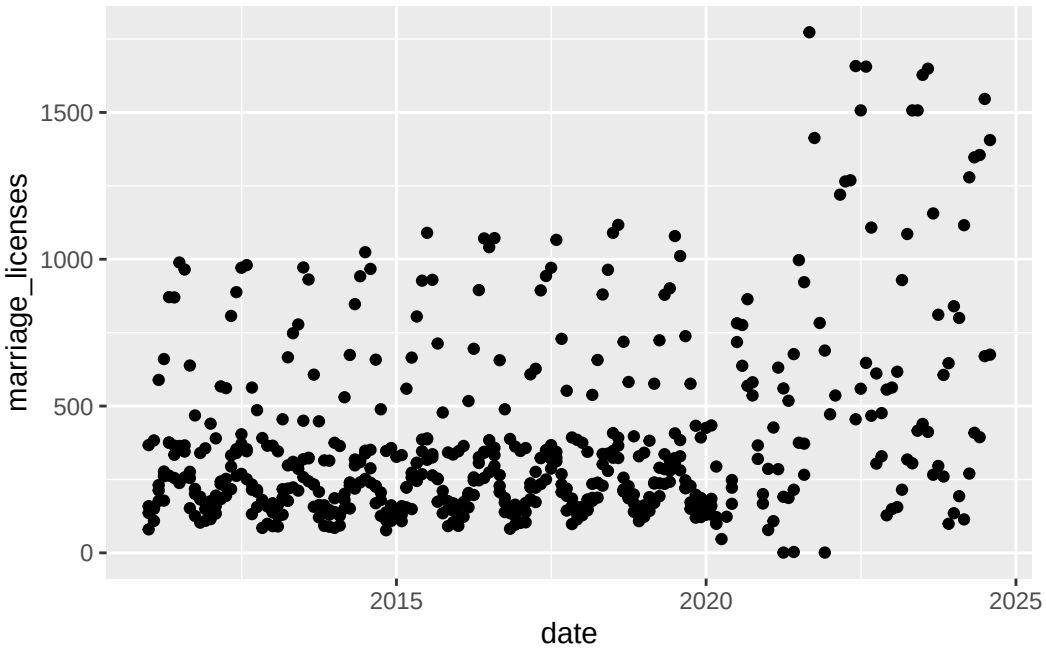

Figure 1: Bills of penguins

3.2 Second discussion point

here is my data graph about marriages in toronto! you can notice in Figure 1 how there arent many marriages after 2020. This potentially could be because of COVID-19, but that doesnt explain why it remains low after the effects of COVID died down a bit in the more recent years - more analysis to follow. ## Third discussion point

3.3 Weaknesses and next steps

Weaknesses and next steps should also be included.

Appendix

A Additional data details
